- and me

## Objectives of WP6

This is where the major part of the recommendations of the ESFRI Assessment Expert Group are taken up.

Relationship between CLARIN ERIC (Office, BoD) and the national teams. Role of the GA.

3 interrelated subtasks

- Governance
- Division of operational and financial responsibilities (central vs de-central)
- Operational, financial and organizational sustainability

Will lead to updated statutes.

2 face-to-face meetings, month 12 and month 22.

## WP6.1 Analysis of governance and management issues (cont.)

Concentrating on governance and management:  
Relationship between CLARIN ERIC (Office, BoD) and the national teams. Role of the GA.

At present most of the resources (human and financial) in CLARIN are placed in the national teams.

If CLARIN is to succeed in the long run, CLARIN ERIC and national teams need to be able to discuss and agree upon which tasks will be treated centrally and which at the national level under central supervision.

Also some smaller, administrative changes will be looked at:

Linked third party, secondment as a staff 'employment'.

## WP6.1 Analysis of governance and management issues (cont.)

And we should investigate collaboration with industry – changes to statutes needed for this?

Anyway, this will lead to updates of statutes.  
To be discussed at many levels, not least at meetings with GA and NCF

Analysis of organisational and governance structure

Month 12

Update of statutes, proposal month 18, deliverable month 22

2 face-to-face meetings, month 12 and month 22.

## WP6.2 Financial analysis

- Cost of key activities
- More accurate description of central tasks and their cost
- Clear division of labour between the central and decentral level
- Input for the cost of setting up a national team (5.1)

## WP6.3 Sustainability, financially and organisationally

Longterm sustainability is important for all.

Brings together WP6.1, 6.2 , WP5 and many of the other activities.

Proposals for how to ensure sustainability will take into account technical, financial and organisational issues.

Report (confidential) month 22.
